

Product Requirements Document (PRD)

Financial Forecasting Website (Prototype Version)

1. Project Overview

Project Name: Financial Forecasting Web App

Project Type: Prototype / Testing Website

Aplikasi website sederhana untuk simulasi dan testing laporan forecast keuangan perusahaan. Website menggunakan login hardcoded, data statis, dan backend JavaScript sederhana.

2. Project Goals

- Membuat simulasi aplikasi forecasting keuangan
 - Menampilkan laporan forecast secara interaktif
 - Menjadi demo/presentation project
 - Mempermudah testing UI/UX dan logic forecasting
-

3. Scope

Included:

- Login page
- Dashboard
- Income Statement Forecast
- Cash Flow Forecast
- Balance Sheet Forecast
- BEP Analysis
- Payback Period Analysis
- Simple charts

Excluded:

- Real database
 - Production authentication
 - API integration
 - Multi-user support
-

4. Tech Stack

Frontend: HTML, CSS, JavaScript

Backend: Node.js + Express.js

Storage: Local Storage / Static JSON

Charts: Chart.js

5. Authentication

Hardcoded Login Example:

Email: admin@test.com

Password: admin123

6. Dashboard Features

- Financial summary cards
 - Revenue overview
 - Profit overview
 - Cash balance overview
 - Forecast charts
 - BEP card
 - Payback Period card
-

7. Income Statement Forecast

Inputs:

- Revenue
- COGS
- Operating Expense
- Tax

Outputs:

- Gross Profit
 - Net Profit
 - Profit Margin
-

8. Cash Flow Forecast

Inputs:

- Cash In: - Sales - Investment Cash Out: - Salary - Operational Cost
- Outputs:**
- Net Cash Flow
 - Remaining Balance
-

9. Balance Sheet Forecast

Inputs:

- Assets: - Cash - Inventory - Equipment Liabilities: - Debt - Payables Equity: - Capital
- Outputs:**
- Total Assets
 - Total Liabilities
 - Total Equity
-

10. Financial Analysis Metrics

A. Break Even Point (BEP)

Formula:

$BEP = \text{Fixed Cost} / (\text{Selling Price per Unit} - \text{Variable Cost per Unit})$

Outputs: - Break Even Unit - Break Even Revenue - Profitability Indicator

11. Payback Period

Formula:

$\text{Payback Period} = \text{Initial Investment} / \text{Annual Cash Inflow}$

Outputs:

- Estimated Payback Time
 - Investment Recovery Status
 - ROI Indicator
-

12. Forecasting Logic

Menggunakan simple percentage growth calculation. Example: Current Revenue = 100,000 Growth = 10%
Forecast Revenue = 110,000

13. Pages Structure

- Login Page
 - Dashboard Page
 - Income Statement Page
 - Cash Flow Page
 - Balance Sheet Page
 - Financial Analysis Page
-

14. Folder Structure

```
project/ ■■■■ frontend/ ■■■■ index.html ■■■■ dashboard.html ■■■■ css/ ■■■■ js/ ■■■■ backend/ ■■■■  
server.js ■■■■ routes/ ■■■■ data/ ■■■■ package.json
```

15. API Endpoints

POST /login
GET /income-statement
GET /cash-flow
GET /balance-sheet
GET /financial-analysis

16. Static Data Example

```
{ "revenue": 100000, "cogs": 40000, "expenses": 20000, "tax": 5000, "fixedCost": 50000, "variableCost": 20, "sellingPrice": 50, "initialInvestment": 100000, "annualCashInflow": 25000 }
```

17. Non Functional Requirements

- Fast loading
 - Lightweight
 - Responsive Design
 - Chrome / Edge / Firefox support
-

18. Future Improvements

- Real database integration
 - JWT Authentication
 - AI Forecasting
 - Export PDF/Excel
 - Multi-company support
-

19. Success Criteria

- Login works correctly
 - Forecast calculation works
 - Dashboard renders correctly
 - Charts display correctly
-

20. Conclusion

Financial Forecasting Website merupakan prototype aplikasi forecasting keuangan berbasis web menggunakan HTML, CSS, JavaScript, dan Node.js. Fitur utama: - Income Statement Forecast - Cash Flow Forecast - Balance Sheet Forecast - BEP Analysis - Payback Period Analysis Aplikasi dibuat untuk kebutuhan testing, simulasi, dan demonstrasi.
